I have no problem with an extension of time, contingent on the time being spent getting to the bottom of what is going on over there, and why they believe that I can't prove my identity, so that I can open up a bank account. I don't know if I am able to get another check from a settlement in the district court, which was from the "black only" coronavirus fund settlement.

If you need any evidence to prove my identity, please let me know.
